

ENVIRONMENTAL MANAGEMENT POLICY

Canopy Growth and its subsidiaries are committed to managing our environmental impact as an integral part of our operations. In particular, it is our policy to assure the environmental integrity of our processes and facilities at all times.

We are committed to providing quality products and services in a manner that ensures a safe and healthy workplace for our employees and minimizes our potential impact on the environment. We will operate in compliance with all relevant federal, provincial, and municipal environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

We will integrate the consideration of environmental concerns and impacts into all of our decision making and activities and promote environmental awareness among our employees. We educate and encourage them to work in an environmentally responsible manner.

We are committed to our recycling program and avoid unnecessary use of hazardous materials and products by seeking out substitutions when feasible to take all reasonable steps to protect human health and the environment when such materials must be used, stored, and disposed of. We have developed and maintained appropriate emergency and spill response programs through training, inspections and responsible disposal when required.

At Canopy Growth, we strive through Continuous Improvement. Through our growth we are able to evolve our environmental performance and further reduce our environmental footprint.

We are dedicated to environmental improvements that foster a sustainable future and lead to social and economic improvements in the communities in which we do business.
